### Description

Handles are not just a practical necessity, they are also an important and creative extension of your pottery pieces.

---

### **Make beautiful, consistent handles effortlessly!**

Our pottery handle makers, or hand extruders, are a simple solution for making quick, easy, no-fuss handles – perfect if you need to make a lot of them in a short period of time!

### **Consistent and uniform**

At Pottery Supplies we have two oval shaped handles to choose from, each of them will allow you to make consistent and uniform handles from blocks or slabs of clay, every time! Choose one, or both for more options. A must-have tool for the beginner hobbyist through to the professional production potter. Our handle makers are made from high grade steel with a comfortable, polished wood handle.

This particular handle maker (PF0902) is 25mm wide - a great size for medium to larger sized vessels.

## **So simple and fast**

So easy and quick to use. Simply run this tool through a block or slab of clay and you can produce multiple handles of the same shape and length. Perfect for cups and mugs, pitchers, teapots and more. A handy extrusion tool that's mobile and you don't have to attach to a wall!

---

Dimensions: Oval shaped handle maker that is 25mm wide and 13mm thick. Wooden handle is 100mm.
