Description

Forged stainless steel tools for sgraffito carving and relief work – 7 piece tool kit

Scratch the surface of stunning ceramic designs with fine and precise sgraffito tools.

Sgraffito (Italian word 'to scratch') is a surface decorating technique in pottery that is produced by applying one or more layers of colour (underglaze, slip or engobes) on to leather hard clay, then scratching and carving patterns, textures and illustrations to reveal the contrasting colour of the clay underneath.

Creativity and artistry

These sgraffito tools will enable you to create fine and precise carved images on the surface of your leather hard pots, adding more dimension and vibrancy to your pottery.

Fine and detailed carvings

The variety of sharp edges on these tools, from a fine point, corners, and wider blades, will

broaden your scope for creating fine and detailed carvings. This sharpness and strength of the forged stainless steel also make this tool kit perfect for incising and scratching through glazes applied to bisqueware.

Ergonomic design

The textured grip and comforting weight of the metal handle make them easy and enjoyable to use.

Dimensions: Tools are 15cm. Each tool weighs just under 30gm.
