Description

An easy way to draw and paint on your ceramic surfaces.

Beautiful, flowing slip trailed decorations

The larger gauge rubber nozzle is perfect for exploring bolder strokes and swirls in your slip trailed designs.

Slip trailing with ease

Complete with hard rubber nozzle and detachable soft rubber bulb this slip trailing applicator allows you to do smooth and effortless decorating with liquids whether it be underglazes, slip or glazes. Easy to use and offers unlimited possibilities.

Tips for beautiful slip trailing

Practice first to get used to the slip trailing bulb applicator. We recommend using on bone dry clay or bisque ware for best effect. Shake the liquid down to the nozzle end of the trailer and add a little water if necessary to ensure smooth flow. Drag the nozzle of the trailer across the surface of your pottery and never dig the nozzle into your surface – the movement of the slip

trailer should be in the opposite direction in which the nozzle is pointed.

Dimensions: 17.5cm length. Volume 100cc
