

## Mid Fire Glazes

Mid Fire Glazes are ceramic glazes that are fired at mid-range temperatures, typically at cone 5-6, resulting in vibrant and durable finishes on pottery. These brush on glazes offer a variety of colours and effects, from glossy, transparent and smooth to matte and textured. Experiment with a wide spectrum of colours, from deep blues and green to white and clear glazes.

Explore our [mid fire clays](#) to complement these mid fire glazes.
